Cooking directions will be on the box. Cooking times are approximate and may need a little less
time or a little more time, depending on your oven and your oven skills. We have faith in you!
Un-used fresh lasagna and lasagna purchased warm can be frozen and eaten later. Re-freezing
the frozen lasagna probably isn't going to be a good idea but you can certainly refrigerate it and
re-heat later. We suggest baking it for crispy edges, but you can certainly nuke it on a plate
covered in plastic wrap to the temperature you desire.
